EDUCATION

- Indira Gandhi Delhi Technical University for Women** Delhi, India
Bachelor of Technology-Computer Science and Engineering-Artificial Intelligence; GPA: 9.75 2022 - Present
- Bal Bhavan Public School** Delhi, India
Class XII; Percentage: 95.6 2022

EXPERIENCE

- LinkedIn**
Software Engineering Intern May 2025 - August 2025
 - Diagnostic Summarization:** Engineered an LLM-based alert summarization system utilizing the GPT 4o model, condensing complex infrastructure diagnostic reports into concise, actionable summaries within 10 seconds
 - LLM Guided Fault Resolution:** Designed and implemented a Retrieval-Augmented Generation (RAG) pipeline to generate resolution steps within 20 seconds enhancing response accuracy and reducing manual troubleshooting.
 - AI Assistant for Fault Resolution:** Developed a CLI based LangGraph assistant to diagnose and resolve system faults through secure remote command execution reducing the MTTR(Mean Time to Resolve)
- Defence Research and Development Organisation (DRDO)**
Research Intern June 2024 - July 2024
 - Leveraging Deep Learning in Cryptanalysis:** Leveraged deep learning for cryptanalysis to detect distinguishability in stream ciphers; identified consistent keystream patterns enabling accurate differentiation of RC4 and NGG ciphers.
 - Research Paper:** Deep Learning Based Distinguisher of Stream Ciphers published in ICMC 2025 Proceedings by IIT Bhilai.

PROJECTS

- Image Forgery Detection using Deep Learning :**
Built an image tampering detection system using CNN-based models on the CASIA v2.0 dataset. Improved detection performance by augmenting ResNet18 with CBAM attention and applied knowledge distillation.
GitHub: [Image Forgery Detection](#)
Tech: PyTorch, CNNs, Attention Mechanisms, Knowledge Distillation, Image Forensics
- IGDTUW Campus Maps :**
Designed and built an interactive campus navigation system using Google Maps API, HTML, Tailwind CSS, and JavaScript; enabled users to locate buildings and navigate between rooms within multi-floor buildings.
Link: [IGDTUW Campus Navigator](#)
Tech: [Google Maps API](#), HTML, Tailwind CSS, JavaScript

JOURNAL PUBLICATION

- Determining Twitter Trending Hashtags and Sentiments Associated via Machine Learning Approaches (NLP, ML Algorithms, Data Collection, Text Preprocessing):**
Published in Scopus-indexed journal SN Computer Science; achieved 91.84% sentiment classification accuracy using SVM with VADER features, analyzing trending Twitter hashtags over a 6-month period. Extended version of paper presented at ICAIA 2024. DOI - 10.1007/s42979-024-03387-y [Link](#)

ACHIEVEMENTS

- Received UG/PG Incentive Award for Excellence in Research. [Certificate](#) April 2025
- Received Best Paper Award in ICAIA, 2024. [Certificate](#) March 2024
- Selected under the American Express Campus Discovery Program'24 February 2024 - May 2024
- Awarded Mrs. Phool Devi Scholarship in BTech 1st year (Rank 2 among all branches). August 2023
- Selected under the Prime Minister's Scholarship Scheme under National Defence Fund. November 2022

SKILLS SUMMARY

- Languages:** JAVA, Python, SQL, HTML, CSS, JavaScript
- Frameworks:** JQuery, Node.js, Express.js, LangGraph
- Tools and Libraries:** MySQL, numpy, pandas
- Strengths:** Leadership, Resourceful, Communication

VOLUNTEER EXPERIENCE

- Mentor in ACM IGDTUW**
Mentored 2 research teams under ACM IGDTUW on academic writing. [Certificate](#) September 2024 - April 2025
- Associate in Technical Team at AWS Cloud Club IGDTUW**
Mentored 5+ students and contributed to technical projects such as TypeSmartSite [Link](#) April 2024 - Present
